

OneSIM from ITatSea

Inmarsat and other satellite based communication costs are ever increasing and budgets tighter than ever. The pressure is on for ship owners and operators to reduce costs.

VSAT is one solution, but with a high capex spend or a lengthy lease contract it can make the business justification difficult.

Most vessels without VSAT use a single sat connection for email communications, typically Inmarsat fleet broadband. Over recent months Inmarsat have been increasing the cost of data transmission to an average of EUR 10.00 per MB.

A typical vessel will send approx. 30MB to 150MB per month on email and at €10.00 per MB that's between €300.00 and €1500.00 EUR per month.

Satellite is ideal when the vessel is at deep sea but all ships dock and sail near land. This is where oneSIM from ITatSea can help save you money.

By installing an externally mounted weather proof 3G router you can connect to shore mobile networks and transmit your data, cutting out costly satellite circuits and at speeds of up to 21Mbit/s it's fast! Further value is added with the ability to remotely connect to your vessel to provide remote support, saving the cost of sending an engineer to the vessel to fix software problems or install new applications.

Using 3G for ship communications is not a new idea and already commonly used on vessels where the trading patterns can be predicted. Owners can purchase local USB dongles.

The problem is for vessels where the trading patterns cannot be predicted and buying local SIMs can be difficult to manage.

oneSIM works in 135 countries with only 2 airtime rates...

Easy Installation:

Our oneSIM modem can be easily mounted on a standard 1inch pole with a single Ethernet cable running from the unit to the supplied router. It has a unique antenna design to ensure the best possible signal. The connection is protected by a firewall so only the applications you want can access the device.

Costs:

Plan	Inclusive Zone A Data MB	Cost per month	Zone A Data charge per MB outside allowance	Zone B Data charge per MB outside allowance	One off hardware Cost
1000 Plan	1000	€490.00	€0.39	€0.89	€600.00
500 Plan	500	€295.00	€0.49	€0.94	€700.00
PAY-GO	-	€15.00	€0.59	€0.99	€800.00

For a small monthly service charge of €5 it's possible to cap your monthly usage for total piece of mind.

Zone A (Europe, USA and Canada)

Austria	Greece	Poland
Belgium	Hungary	Portugal
Bulgaria	Iceland	Romania
Cyprus	Ireland	Slovakia
Czech Republic	Italy	Slovenia
Denmark	Latvia	Spain
Estonia	Liechtenstein	Switzerland
France	Lithuania	The Netherlands
Germany	Luxembourg	United Kingdom
Gibraltar	Malta	Canada
		USA

Note: Sweden, Norway and Finland operate a different implementation of 3G, therefore oneSIM will not work in these countries.

Zone B (rest of the world)

Albania	Honduras	Paraguay
Antiqua	Hong Kong	Peru
Argentina	India	Philippines
Aruba	Indonesia	Qatar
Australia	Israel	Reunion Réunion
Bahamas	Isle of Man*	Russian Federation
Bahrain	Jamaica	Rwanda
